

FEEDSTUFF POTATO PROTEIN

Product in compliance with Polish and European feedstuff regulations.

Feedstuff material no 4.8.10

Organoleptic characteristics

Appearance	loose powder
Colour	light brown
Smell	typical for potato protein

Physical chemistry parameters

Moistness [%]	max. 10
Sifting with a sieve 2 mm square mesh[%]	100
Content of raw protein in dry matter [%]	min. 80
Content of ash in dry matter [%]	max. 4,5

Microbiological parameters

General bacteria count in 1g	max. 30 000
Moulds and candida in 1g	max. 100
<i>Salmonella</i> rod-shaped bacteria in 25g	none

GMO status
Product free from genetic modifications.

Best before
24 months from date of production

Origin or raw material
Raw material for production process of feedstuff potato protein is starch potato of Polish origin.

Storage conditions
Store in a cool dry place.

Unit packaging
Paper valve bags of 25 kg each.
